## CORPORATE OVERVIEW

CCI Group Ltd is an engineering company serving the process industry and provides Engineering, Design, Construction and Contract Personnel Services as a single window organization on a global basis.

The strength of our company lies in the depth and breadth of our CADD technology and project management experience. Our geographical depth and market penetration reach worldwide, giving us access to various sources and services to match the needs of our clients.

CCI Group executes projects within the Process Industries:

- Oil and Gas
- HVAC
- Pharmaceutical/Food
- Semiconductor
- Industrial
- Mining

CCI Group is specifically designed and organized to target projects, which are too small for major EPC contractors to handle cost effectively. Our quality system and procedures allow us to compete on both domestic and international projects and to provide reliable value for money.

## MISSION STATEMENT

*Using vitality to support clients and ourselves as we create our technical qualities in a vigorous company.*

*Satisfying our clients while protecting our organization's interest in a cost effective manner.*

*Maintaining a quality management system that is a valuable asset in winning and keeping of business.*

## CORE VALUES

We are committed to delivering fair value to our customers and build long-term relationships that will afford our clients solutions today and in the future. All services provided by CCI Group meet the strict requirements of International codes of practice and standards. Being a TECHNOLOGY MANAGEMENT COMPANY, we aim to go beyond the supply of services. The company's essential value is based on the belief in and utilization of man his most profound resources:

### *Creativeness and Understanding*

Safety is a key focus for our business environment. Therefore CCI Group's management is committed to implement and persistently maintain high standards of safety. To achieve this objective all our employees work diligently at the execution of CCI Group's Safety Policy.
